Feet / Legs	✓																																						
Eyes	✓																																						
Vesicular glands	✓																																						
Ampullae/Prostate	✓																																						
Inguinal Rings	✓																																						
Penis / Prepuce	✓																																						
Testes / Spermatic Cord	✓																																						
Epididymides	✓																																						
Scrotum	✓ <u>Ovoid</u>																																						
Other findings																																							
Semen Characteristics	Ejaculate 1	Ejaculate 2																																					
Motility (%)	<u>90+</u>																																						
Normal cells (%)	<u>93</u>																																						
<del>Primary</del> Abnormalities (%)	<u>7</u>																																						
<del>Secondary</del> Abnormalities (%)																																							
WBC/RBC/Cells/Other																																							

Scrotal circumference (CM) 39.2

### Classification

Interpretation of the data resulting from the examination on this date would indicate this bull is a:

- Satisfactory potential breeder
- Unsatisfactory potential breeder
- Classification deferred

Re-examination:
